

Project Milestone 3

Team Number: 101-2

Team Name: Team Search and Rescue

Team Members: Devin Murray, Namita Pasupuleti, Omar Kaheel, James Singer, Amaica Webb, Marissa Zuyus

Features completed:

- Add item page
- Homepage
- Search item page
- Database created
- Adding items to database via form

What worked during the demo:

- Database instantiation
- Design and Formatting of
 - Home Page
 - Add Item Page

What issues were faced:

- Everything worked as intended but they were difficult to show because there was very little integration even between web pages.

What were the suggestions offered by the TA:

- Try to simplify the process as much as possible so that we don't have a lot of very complex features
- We should focus on the process of creating and handling everything before we start thinking about matching
- Possibly leave matching to be done manually as opposed to automated
